

## eurolpacEDELHOLZ Formenhybrid

Perfection in 3-D - awarded with the German Design Award 2018

The **eurolpacEDELHOLZ Formenhybrid** combines technologies from three different areas and creates a material that sets fully new standards in its diversity and originality.

The precious wood layers of up to 1.5 mm thickness are made flexible by means of an innovative vaporiser technology, which can then be pressed in a second step by means of a vacuum press into 3d moulds. By the "refining" of the precious woods with digital printing there can be features plotted according to the trends which are not possible with a normal surface treatment. The combination with the equally innovative calender roll technology, with which structures can be inserted into the precious woods, makes **Formenhybrid** perfect.

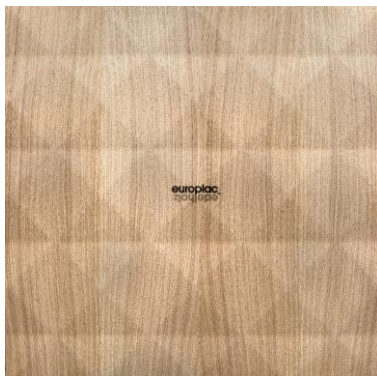

<b>Surface:</b>	Precious wood layers from 0.6 mm to 1.5 mm thickness
<b>Quality:</b>	A board character strips / B
<b>Noblewood:</b>	- European oak                      - Smoked oak - Ash                                      - Birch burl - Beech steamed                      - Wenge - American walnut                  - Fir - Larch                                    - Others on request
<b>Carrier plate:</b>	MDF 18 mm or MDF soak-dyed black 19 mm
<b>Formats:</b>	2440 x 1220 mm / 3050 x 1220 mm / other formats on request
<b>Variation:</b>	Pyramid, Pyramid soft
<b>Optional:</b>	<b>As a variation also with "INDEWO®" digital printing</b> <ul style="list-style-type: none"><li>• Rhombus black/ Rhombus white</li><li>• Elipse black/ Ellipse white</li></ul>

- Gluing:** Cover layers are glued free of formaldehyde
- Application:** Exclusive wall claddings, innovative shopfitting or extraordinary objects
- Advantage:** Very special, striking and unique look - both in surfaces and on small furniture

**Formenhybrid Variations:**

Pyramid

Pyramid soft
