

DOLLYWOOD Wool & Wood

Unique and sustainable material combination of wool and wood

DOLLYWOOD is made for wall and ceiling coverings. The sandwich construction consists of a formaldehyde-free MDF board, the middle part consists of pressed and sound-absorbing sheep's wool and the visible top layer is made of noble wood. Patterns, lettering or graphic symbols can be lasered out as required.

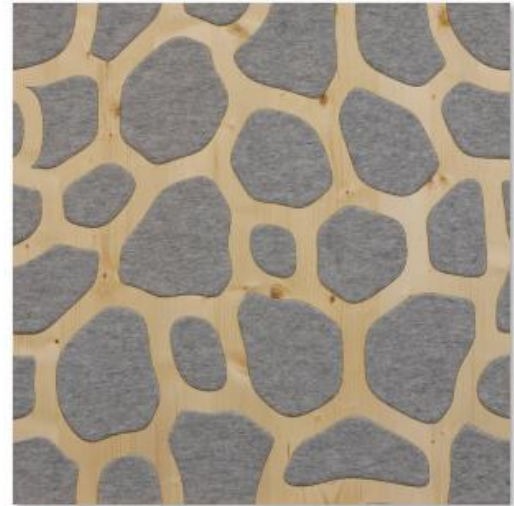

With DOLLYWOOD, europ^lac brings together two materials that are on an equal footing when it comes to naturalness and sustainable production.
