europ^lacMANUFACTUR develops this innovative noble wood product by the use of latest production technologies and development processes.

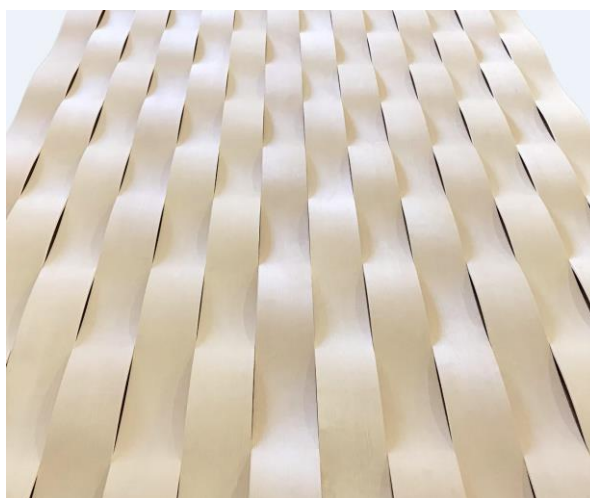

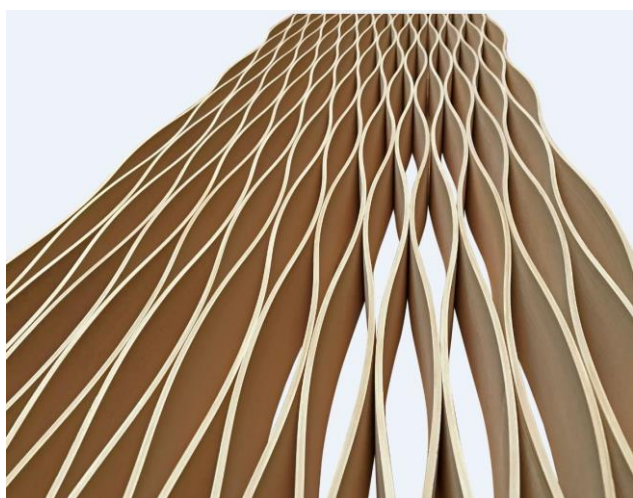

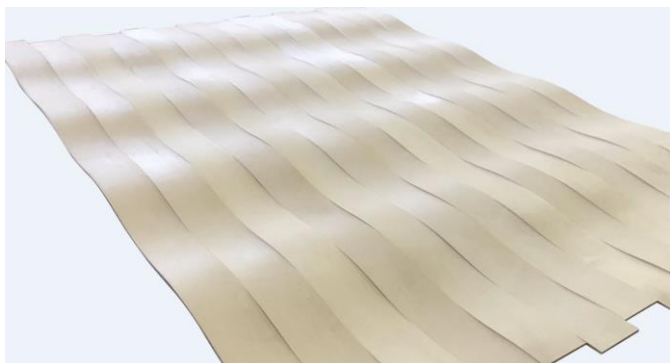

The fine wave VARIOPLEX offers you a multitude of unique designs. The single or interwoven wave optic creates individual highlights in every interior.

For a quick and easy processing the lamellas can either be fixed on a panel or for maximum flexibility being offered as single elements. To ensure a maximum flexibility for a customer, we also offer the alternative - the separately produced lamellae.

VARIOPLEX is available in 140 noble wood species on stock. Whether classically designed in oak, elegant in cherry or rustic with knots the lamellas can be manufactured to suit every requirement. This offers unlimited creative possibilities.
